

# TPP v.1.1.13.0 updated

## 29.08.2023

If paid support expired before 29.08.2023, this TOPODRONE Post Processing version will not work for a user. It is necessary to either pay for support or download previous version distributive, the release date of which is earlier than the expiration date of paid support.

Get the distribution: [TOPODRONE Software Distributor](#)

+ **Added:** automated download of geoids from TOPODRONE server (199 geoids). Now geoids are not included in the distribution (reducing the size of the distribution), but are downloaded by users as needed.

+ **Added:** orthophoto generation module (Photogrammetry)
