

TPP v.1.1.17.0 updated

13.11.2023

If paid support expired before 13.11.2024, this TOPODRONE Post Processing version will not work for a user. It is necessary to either pay for support or download previous version distributive, the release date of which is earlier than the expiration date of paid support.

Get the distribution: [TOPODRONE Software Distributor](#)

+ **Added:** Static Post Processing: automatic addition of coordinates from GNSS files

+ **Added:** Lidar Cloud Generation: automatic UTM projection selection (if user has not specified a projection)

Revision #8
