

# TPP v.1.2.0.0 updated

## 20.11.2023

If paid support expired before 20.11.2023, this TOPODRONE Post Processing version will not work for a user. It is necessary to either pay for support or download previous version distributive, the release date of which is earlier than the expiration date of paid support.

Get the distribution: [TOPODRONE Software Distributor](#)

- + **Added:** Type of lidar survey is determined automatically (Aerial/Terrestrial)
- + **Added:** LiDAR firing direction is determined automatically (Forward/Backward)
- + **Added:** alternative calculation of track coordinates (algorithm of complex processing of GNSS angular positioning system information).
