

TPP v.1.2.0.1 updated

23.11.2023

If paid support expired before 10.10.2024, this TOPODRONE Post Processing version will not work for a user. It is necessary to either pay for support or download previous version distributive, the release date of which is earlier than the expiration date of paid support.

Get the distribution: [TOPODRONE Software Distributor](#)

+ **Added:** switch in the settings to standard/expert modes. Expert mode allows the user to specify the IMU and lidar model. Standard mode performs automatic equipment detection.

Revision #9
